Experienced Senior Frontend Engineer with Vue, Nuxt, React, TypeScript, Next, AWS, MongoDB, Express, Tailwind and Node. Passionate about coding and helping people in agile teams. I build clean, performative and scalable user experiences and infrastructures.

MY WORK EXPERIENCE

Senior Frontend Developer
Sdui Gmbh
Berlin, Germany
02/2023 - 06/2024

- Increased user interaction by 20% by redesigning and extending editing workflows in a Vue.js App.
- Conceptualized and built React.js features, improved engagement, aligned with stakeholders independently.
- Developed a migration guide to help developers transition from Vue 2 to Vue 3 for cross-functional teams.
- Wrote unit and E2E tests using Cypress, Jest, Vue Test Utils to ensure app stability and test critical user flows.
- Helped developers through pair programming and 1v1s to write tests, conceptualise and implement features.
  See More

Senior Frontend Engineer
Homeday Gmbh
Berlin, Germany
03/2020 - 01/2023

- Migrated components and pages from PHP to Vue + Nuxt, improved page speeds up to 30%.*
- Built Infrastructure as Code with AWS and GitHub Actions, reducing cloud costs by 15%.*use case
- Accelerated CI/CDs by 25% through replacing unit tests with integration tests using Testing Library + Mirage.
- Implemented features for multiple Vue apps and a shared design system with 30+ designers and developers.
- Partnered with backend and DevOps teams to support blue-green deployments, uptime monitoring w/ Grafana.
- Created structured mentorship programs, coaching career switchers and developers through 1v1 sessions.
- Maintained and built features for a PHP-based (Symfony) app, improved performance for property detail pages.
  See More

Frontend Developer
Turkish Radio Television Corporation (TRT World)
Istanbul, Turkey
03/2018 - 02/2020

- Optimized rendering performance for landing pages, debounced API interactions, and employed lazy loading and caching to ensure responsiveness even under peak usage, reducing load times by 25%.
- Developed and maintained dynamic map widgets for 2018 elections that handled real-time user interactions for over 75k+ concurrent users.
- Implemented features for a Vue, Node.js app using debounce, search algorithms, and fast keyboard search logic to accelerate workflows by 50%.
- Developed and optimized a CMS editor, improved UI/UX across the app, reducing content creation time by 30%

Full Stack Developer
Crabs Media Web Agency
Istanbul, Turkey
05/2012 - 01/2018

- Built 50+ custom WordPress templates using HTML, CSS, JS, WordPress, PHP and MySQL.
- Mentored juniors in converting PSDs to responsive UIs and building custom WordPress themes.
